

Alcatel-Lucent launches Web Services Gateway Release 3.0

Alcatel-Lucent is positioned as a visionary in leading analyst report

Paris, April 15, 2009 - Alcatel-Lucent (Paris: Euronext and NYSE: ALU) today announced Release 3.0 of the Alcatel-Lucent [OmniAccess 8550 Web Services Gateway](#) (WSG), a Service Oriented Architecture (SOA) appliance that lets enterprises and service providers deliver an open and secure Web services environment for their customers' business-to-business transactions and Web 2.0 services. Alcatel-Lucent's WSG ensures that companies transforming their businesses through business process automation, Web 2.0 and cloud computing can secure and govern how users interact online to prevent fraud, mitigate risk and maintain compliance. Cloud computing implies the use of Internet-based, sometimes virtualized, resources and services.

Alcatel-Lucent was positioned in the March 2009 Gartner Magic Quadrant for Integrated SOA Governance Technology Sets¹, authored by L. Frank Kenney, Daryl C. Plummer, placed in the "visionaries" quadrant. For more information please see <http://www1.alcatel-lucent.com/enterprise/soagovernance>.

The Alcatel-Lucent 8550 WSG Release 3.0 provides a highly detailed level of control that lets innovative service providers securely provide new Internet-based, revenue-generating services. Protected by the Web Services Gateway, a service provider could allow an entertainment company, for example, to provide its movie schedule information to a user without jeopardizing either the third party or service provider's security.

Key technology developments in the Alcatel-Lucent 8550 WSG Release 3.0 include:

- Detailed, context-sensitive capture of usage patterns that lets organizations monitor and adapt to security breaches -- including fraudulent transactions from trusted users
- Efficient, flexible, high-performance policy evaluation and contextual policy enforcement for protection of private information
- Granular views of user-centric Web services, ensuring authorized individuals (including those offering third-party services) have access to the information they require
- Enhanced monitoring of user interactions and Web services, ensuring specified service level agreements.

"The 8550 Web Services Gateway provides the enterprise a reusable corporate-wide infrastructure that can be applied to many facets of governance, from security to compliance," said Michel Emelianoff, Alcatel-Lucent vice president of Enterprise Security Solutions. "The new functionality offered with Release 3.0 better meets the needs of Alcatel-Lucent's enterprise and service provider customers."

More information about the wide range of Alcatel-Lucent [security solutions](#) is available online. Additionally, Alcatel-Lucent will be at RSA Conference 2009 April 21-23 at booth #317.

¹About the Magic Quadrant

The Magic Quadrant is copyrighted March 31, 2009 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant

to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.
